

## NG Fueling Station

Owner: University of New Hampshire

Location: Durham, New Hampshire

Engineered construction Services Inc. completed construction of the Rapid fill natural gas fueling station in southern New Hampshire designed specifically for the fueling of motor vehicles.

The project scope included installation of New electrical service, Site work, Gas filtration system, Gas compressor, 15# natural gas piping from utility system through to compressor and 4,500# lines from compressor to storage and dispensers.

In conjunction with the filling station, up grades to the facility maintenance garage were made including installation of new fire doors, masonry repairs, fire stopping and a complete LEL monitoring, automation and notification system integrated into the existing building.
